 - Acceptance of pre-nursing courses taken outside the Los Rios Community College District will be determined by the Nursing Department Admissions Committee.
 - Final acceptance into the nursing program is contingent upon approval of background check and drug screen results by the healthcare systems used for clinical rotations in the program.
 - Note: The California Board of Registered Nursing protects the public by screening applicants for licensure in order to identify potentially unsafe practitioners. The law provides for denial of licensure for crimes or acts, which are substantially related to nursing qualifications, functions or duties. At time of licensure application, all convictions must be reported except for minor traffic violations. (Business and Professions Code 480 and Nurse Practice Act article 3 section 2761)
 - Pursuant to Section 30(c) of the Business and Professions code the Board of Registered Nursing (BRN) will not process any application for licensure unless the applicant provides a U.S. social security number. The Nursing Practice Act provides for a unified examination and licensing application. Once an applicant passes the examination, a license is automatically issued. Under these circumstances the BRN cannot accept applications for the examination and licensure without a U.S. social security number.
