## New Coursework on the Horizon

Reliable sources say that a highly competitive community college in a neighboring state, in response to California's legislation AB705 and attendant changes in CA colleges, has created its own fall schedule of classes. The change entails a heavy emphasis on acceleration and a clever melding of fields and majors. A few new classes are as follows.

- **Welsh Grammar and Culinary Arts 12 units**
- **Quantum Physics and Traditional Folk Music 12 units**
- **Wind Technology and the Humor of Dostoevsky 12 units**
- **The Wonder of Deep Sleep and Advanced Study Skills 12 units**
- **Medical Transcription and the Combustible Engine 12 units**

Experts are confident that the very innovative measures will see a rapid acceleration through the learning process as well as students with a unique and broad education.
